

testing::Test

testing::WithParamInterface< T >

testing::TestWithParam< int >

TestGenerationTest

```
graph BT; TG[TestGenerationTest] --> TW[testing::TestWithParam< int >]; TW --> T[testing::Test]; TW --> WI[testing::WithParamInterface< T >];
```

The diagram illustrates the following relationships:

- TestGenerationTest** inherits from **testing::TestWithParam< int >**.
- testing::TestWithParam< int >** inherits from both **testing::Test** and **testing::WithParamInterface< T >**.
