

std::true_type

P1

testing::internal::conjunction< P1 >

```
graph TD; A[std::true_type] --- B[P1]; B --> C[testing::internal::conjunction< P1 >]; C --> A;
```

The diagram illustrates a relationship between three entities. At the top, there are two rectangular boxes: the left one contains the text 'std::true_type' and the right one contains 'P1'. A horizontal line connects the bottom of these two boxes. From the center of this line, a vertical line descends to a third rectangular box at the bottom, which contains the text 'testing::internal::conjunction< P1 >'. From the left side of this bottom box, a line extends leftwards and then turns upwards as an arrow pointing to the bottom of the 'std::true_type' box. Similarly, from the right side of the bottom box, a line extends rightwards and then turns upwards as an arrow pointing to the bottom of the 'P1' box.
